

CEWELD SPA NiCrBSi

TYPE	High-alloyed tubular wire on a NiCrBSi alloy for thermal spray (flame and electric)
ANWENDUNGEN	Applications that require Corrosion resistance in combination with high temperature applications.
EIGENSCHAFTEN	High temperature and corrosion resistance with excellent ductile coating structure, all spray metal requires no buffer layer. Recommended for coatings against erosion and corrosion and ingreased temperatures.
KLASSIFIKATION	
GEEIGNET FÜR	Pulling, drawing tools, cable trolleys, fan blades, dies, food processing screws, extruders etc.
ZULASSUNGEN	
SCHWEISSPOSITIONEN	
MECHANISCHE GÜTEWERTE	
RÜCKTROCKNUNG	Not required
GAS ACC. EN ISO 14175
