

CEWELD SP 1.4370

TYPE	High Manganese alloyed stainless steel wire. Excellent wearing qualities and good corrosion resistance		
ANWENDUNGEN	Recommended for applications where high corrosion resistance and relatively low wear protection are required. SP 1.4370 is good for general machine element work including hydraulic rams, rolls and for applications in the food industry.		
EIGENSCHAFTEN	Coatings of SP 1.4370 exhibit low shrink and are recommend for internal diameters, particularly where thick coatings are needed. Using the combustion wire spray process, SP 1.4370 coatings can be sprayed thicker than SP 1.4316 coatings, but not as thick as SP 420-B coatings.		
KLASSIFIKATION	EN ISO W.Nr.	14919: 5.12 1.4370	
GEEIGNET FÜR	Metals spray wire with good corrosion resistance and low shrink factor, recommended for inside diameters.
