

CEWELD 312

TYPE	Solid stainless steel welding wire for dissimilar welding. (Type 29 9, 312, 1.4337)						
APPLICATIONS	CEWELD® 312 was developed for welding buffer layers prior to build-up welding of armor plates, exhaust systems, high-manganese austenitic steel, and for heterogeneous welding of difficult-to-weld and unknown steels. Another application is the production of tough joints (one layer) of unalloyed or low-alloy, higher-strength structural steels to manganese hard steel and CrNiMn steels. It is also suitable for build-ups on couplings, gears, shafts, etc., as well as for repairing tools. Max. operating temperature: 300 °C						
PROPERTIES	CEWELD® 312 has a scale resistance of up to 1150°C, is crack and wear resistant, and is suitable for rebuilding worn parts. CEWELD® 312 has a low tendency to hot cracking and good toughness and strength properties. In addition, the weld metal is cold worked.						
CLASSIFICATION	AWS	A 5.9: ER312					
	EN ISO	14343-A: G 29 9					
	W.Nr.	1.4337					
	F-nr	6
