

CEWELD SPA NiCrBSi

TYPE	High-alloyed tubular wire on a NiCrBSi alloy for thermal spray (flame and electric)
APPLICATIONS	Applications that require Corrosion resistance in combination with high temperature applications.
PROPERTIES	High temperature and corrosion resistance with excellent ductile coating structure, all spray metal requires no buffer layer. Recommended for coatings against erosion and corrosion and ingreased temperatures.
CLASSIFICATION	
SUITABLE FOR	Pulling, drawing tools, cable trolleys, fan blades, dies, food processing screws, extruders etc.
APPROVALS	
WELDING POSITIONS	
MECHANICAL PROPERTIES	
REDRYING	Not required
GAS ACC. EN ISO 14175
